

PROJECT SUMMARY

West Main Street Storm Drainage Improvements – Laurel to Quince

Project Description

Currently stormwater ponds along the south intersections of West Main St. from Laurel to Peach Street. Project will extend the storm drain system up West Main Street, drainage inlets will be installed to collect stormwater.

Why this project is important

Stormwater ponding in the street is a hazard and nuisance to the public, stormwater ponding in the street also contributes to premature failure of the pavement.

Project Budget

21-23 Adopted Biennium Budget

Page 9-24

\$392,500
